Summary

This mod turn your dummy 13 figure into a fairy

I call it "Fairy Mod" because I want to come back and revisit the model to add feature relative to fairy. I scaled up some decoration to the size of a 200% Dummy 13 and add a connection to connect on the wing connection backpack. you can print multiple color infill since I make them replaceable.

is a great combination with the Dummy 13 female mod

(didn't had the time yet to print wings #1, the pictures i took are wing #2, my favorite for the moment)
