Tags: [arduino](#) [adapter](#) [arduinonano](#) [nano](#) [arduinonanocase](#)

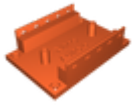

This design allows you to attach an Arduino Nano through the popular Deek-Robot Nano Terminal Adapter in a more robust fashion to your projects.

It allows a pretty degree of stability in front of movements and vibrations with 4 attachment holes and anchors for cable ties.

For best results, remember to keep your printer well calibrated and your slicer well optimized, specially in terms of dimensional accuracy.

Cheers!
