I love using the bench dogs but its annoying that when not in use, trash can either pass threw or collect in the holes, making cleanup harder. Anyway, I designed this cover/plug to stop that. Using this, trash stays in one general area, for faster cleanup

- I designed it for 3/4 in bench dogs. They have a diameter of .74 in which allows for a tight fit but is still easy to push out from the bottom.

I think that this can be scaled up to work on 1in bench dogs but have not done the math for it.
