I don't like getting poked by my wire brush when it's in my tool bag. Thus I created this so I could leave it hanging on a wall outside of my bag.

It's not something I use often, so that is why its just a wall mount instead of a "carry case."

Print setting

- I think you should print it at 110% because it's a bit too tight of a fit.
- 10% cubic infill if you want

Mounting

- I did not include a screw hole, i manually drilled a hole in the back.
- You can also use doublesided tape
