I decided to make a 3D version of my site's 2D logo.

- It is 3 cubic inches or 76.2 cubic mm wide
- I used 10% cubic infill
- I used this logo as a template to make my N64 logo
- I like this logo because if you rotate it at the correct angle, you keep on seeing our logo
- The picture I took is that the great due to the rather bright color PLA i used.
- I am pretty sure that supports are NEEDED!

I am the owner of <https://www.neocrisis.com/>
