Summary

Funko Pop shelf that uses command strips to stick to your wall with an invisible floating look!

This Shelf uses [these](#) command strips to mount to your wall. The shelf is meant to blend in with the wall and make it look like the funko is floating.

The command strips are rated for 1lb but YMMV. I only use these for one funko each and they are very sturdy and work great.

I recommend you use another command strip or something like double sided tape to stick your pop figure to the shelf to keep it from sliding off.
