Summary

Panel for multiple switches and Connectors (XT60) fixed on the Seat Base of a VW T5

[Hobby & Makers](#) > [Automotive](#)

This is a electric Connection Panel which fits onto the back of the Seat-Base on a VW T5.

The Panel consist of multiple Parts:

- Rückseite --> main plate
- Kabelabdeckung --> used to hide the cables / soldering on the XT60 connectors.
- Beschriftung --> small plate which is going to be screwed to the front and receives a printet P-Touch label
- Klammer --> printet 2*. Clamps the main plate to the seat

All screws are M3. All screws which are screwed into plastic are screwed into M3 heatset inserts.

Exception is the small screw for the "Bechriftung". It is M2 and screwed directly into the plastic.

Recommended to print in ASA or similar material.

Needs a printer with minimum 350*350 bed size
