Summary

Protect your precious Scentbird perfume with the enclosed canister or give it a different style with a colorful case

[Household](#) > [Bathroom](#)

Tags: [perfume](#) [scentbird](#)

Both models feature a perfectly placed opening allowing you to see which perfume you currently have in the case.

For the "Spray Case" you simply have to drop in the vial and turn it 90 degrees to use it. It also features a locking mechanism so the perfume won't be sprayed accidentally.

*Make sure to add tree support on buildplate only for both models.
