Streamline your tool organization with this tailor-made Philips Bahco screwdriver holder, designed exclusively for the IKEA Skadis pegboard system. This 3D model is engineered for a precise fit, catering to the Bahco screwdriver series with the distinctive detailing. The holder accommodates four screwdrivers, ensuring they are neatly organized and easily accessible at all times. Each slot is crafted to hold the screwdrivers securely, with added visibility to the size markings for quick identification. The universal hook system allows for a simple and secure attachment to the Skadis pegboard, providing a stable and reliable hold without the need for extra fittings.

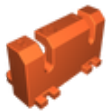

I did not have any yellow filament, so I filled the indentation with paint instead and wiped the surface.
