Summary

This awesome vase has a voronoi exterior for a neat modern look!

This vase has two layers. Ideally, it'd be printed in multi color, but since the MMU for the MK4 isn't available yet and my SV04 is awaiting parts, one will have to do for now. If you can do it in multi color, please share a make! Separate files for the outer/inner vases are available.

Print **with supports** at a fine layer height for best results. It can be tricky to remove supports that wound their way between the vases, but it's worth it for the better print quality.

Please consider leaving a make, a like, and sharing with a friend! You can also now [Buy me a Benchy](#) to support me and get sneak peeks of future designs! Thanks!!

Model files

inner.stl

☐ Only the inner vase- for multicolor printing

outer.stl

☐ Only the outer vase- for multicolor printing

voronoi-double-vase.stl

☐ Full version for single color
