Summary

I needed a way to organize my glass rods in the drawers of my US General tool cabinet.

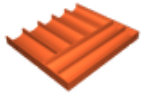

[Hobby & Makers](#) > [Organizers](#)

Printed on the Prusa XL, it takes four trays to fill one drawer. I printed at .3 draft and the print came out lovely. Probably could be printed at even lower resolution and wouldn't affect usefulness. My original intention was to just go with simple front to back channels, but after printing the first two, I realized that with full extension drawers, I could add a couple smaller crosswise trays in front.
