Summary

Prusa Mini tool holder for Ikea Platsa enclosure using the 25mm spaced holes for pin mounting

[3D Printers](#) > [Accessories](#)

Tags: [ikea](#) [ikeaenclosure](#) [toolholder](#) [ikeaplatsa](#) [prusamini](#)

The original design had a pin mount for USB and dual SD cards, but only a mount designed to be taped to the enclosure for the Prusa Mini Tools and USB stick. So as a first remix I thought I'd add a pin mount version.

Printing

- Material: I used Prusament Vanilla White PLA, but should also work well in PETG.
- Print Settings (PrusaSlicer): 0.20mm Quality, 15% infill.
- Supports: Everywhere - Creates supports just for the pins.

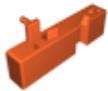

This remix is based on

Ikea Platsa Modular Dual Prusa Enclosure (MINI/MK3s/Bear)
