To use my smartphone as a webcam on my monitor, I designed a simple camera mount with spring-like clamp mechanism. My LG ultra wide screen has a width of approx. 19mm and has a slightly tilted back. There are already several great models for different widths available, but none was fitting my LG monitor. This is why I created this model by scratch. Smartphones with approx. 11mm +/- should perfectly fit.

Tested for an iPhone 15 Pro with silicon case. For bigger smartphone try to scale z axis in slicer.

Print setups:

Layer height: 0.2mm

Material: PLA

Print speed: 60 mm/s

Infill: 15%

No supports needed (print on side)
