Summary

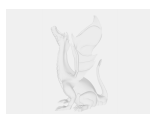

Keep your headphones cable from getting stuck in your chair.

[Household](#) > [Office](#)

Tags: [thingiverse](#)

The cable of my headphones kept getting stuck in the gap between the armrest and the seat of the chair. A quick print later and I had a nice trap for the cable to prevent it from going where it shouldn't. The cable moves freely up and down and stays constrained in its channel, but can be easily clipped out when getting up by twisting and pulling on it slightly.
