I was looking for a way to mount my different sizes of desoldering wick to my IKEA Skadis pegboard, but did not find a fitting model. I therefore made one by myself.

This holder is designed to fit different versions of the small desolder braid reels with about 1.5 m wick on them. These typically have about 30mm in diameter and about 12 mm thickness.

I uploaded three different version of the holder with space for 1 to 3 reels.

I would recommend printing it upside down with PETG and some tree support inside the openings.
