updated 19. 8. 2021 | published 19. 8. 2021

Summary

Remix of model wonderfully crafted by INeedOneDesigns, the only change is a couple of holes used to ziptie the cable

[3D Printers](#) > [3D Printers - Upgrades](#)

Tags: [prusa](#) [mk3](#) [holder](#) [cable](#) [clip](#) [mk3s](#) [heatbed](#)
[ziptie](#)

It's a very simple print, no special needs other than using supports from the build plate.

I used:

- PETG
- 0.2 layer height
- Supports from build plate

Print time: 43 mins (non hacked/tuned MK3S)

This remix is based on

MK3 or MINI Heatbed Cable Support (Easy Clip On)

by INeedOneDesigns
