### Description

A no-support necessary model of a little hedgehog. All it needs is a fluff ball of some kind - yarn or fur pompoms are perfect. Print size at 100% is 40mm/1.5 in. Can be scaled up or down. The smallest I've printed is less than half that.

\*Hedgehogs pictured are painted with paint markers and resin gloss with a yarn puff

Printed on Ender 2 Pro in PLA

Layer height: 0.2 for 100%, 0.1 for smaller

Supports: no

Bed adhesion: skirt/none

Infill: recommend at least 10%

\*\*Update 1-31-2024: Updated for smaller file size and a version with ears

Please tag me if you make them, I love to see!
