Summary

I've been having problems with moisture on my filaments, so I decided to create these silica cases to solve it,

Introducing the "Silica Case" - an indispensable addition to your 3D printing toolkit, offering a convenient and effective way to store reusable silica gel packets within filament packages. This purpose-built case has been designed with the utmost functionality in mind, providing a seamless solution to combat moisture-related challenges and extend the lifespan of your filament.

The silica case is a compact and lightweight unit that effortlessly integrates into your existing filament storage setup, ensuring that it continues to absorb moisture efficiently and maintain your filament's quality.

Say goodbye to filament degradation and hello to consistent print quality with this silica.

Both STL's have already custom brim included.
