Summary

I needed a mount for my TFT35 SPI Screen

You will need to print everything from <https://www.printables.com/model/567043-btt-tft35-spi-v21-pivoting-display-mount> except for the 3030/2020 mounts and the z covers. Follow printing instruction for that mount and you should be golden. I used M3x8's to install my mount to the Barracks. I didn't use a spring in my install and it's perfectly fine.

You'll likely need a longer cable to mount the screen, the one that comes with the tft35 was literally a couple inches shorter than what would be desirable.

My fix for this was to buy another cable and since I couldn't find one longer than 150mm I also bought an extension connector.

<https://a.co/d/9XWyc8p>

I unfortunately can't remix the mount for some reason.

This remix is based on

Barracks, Bottom box for the Rook [MK1]
