[v3](#)

An LED light bar for the Ender 3 V3 SE. Two models are available—one with and one without the filament guide.

The lightbar has been a welcome addition to my Ender 3 V3 SE as I have frequently found myself using a flashlight to check the status of a print.

I used a simple LED light strip purchased from Amazon that can be found by searching for “LED sewing machine light strip”. But of course, any LED light strip should work.
