Summary

3 inch x 6 inch register cover for walls

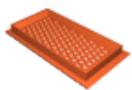

[Art & Design](#) > [Wall-mounted](#)

Tags: [wall](#) [duct](#) [vent](#) [hvac](#) [register](#)

I designed these 3x6 passive wall registers to add a decorative touch to any passive wall vent. I printed these in PLA and they're pretty sturdy but would only use these for passive holes that aren't exposed to heat or stress from being stepped on. If you wish to use these as active floor or duct registers, I would suggest you print them in PETG.
