This is a basic laptop stand. The two pieces of the laptop stand slide together, so you can keep them together in storage. The laptop stand is small enough to be easily stored in a backpack or other bag.

Please note that this is one of my first attempts at modeling using FreeCAD, so please comment or direct message me with any way to improve future models. I would also love to see any way that you can improve this design by remixing it.

Printing Instructions

- Material: PLA or PETG (for extra strength)
- Supports: Yes
- Orientation: Print everything on its flat side

Usage

- Take the two pieces apart
- Place the pieces on either side of your computer
- Place computer on top of the laptop stand

If you enjoy this model, please leave a like and a comment. If you have any questions, concerns, or problems, please personally contact me.
