Here is a case for the google pixel 8 with a separate printable camera guard. The camera guard lets you place your phone down without ever placing it on the camera! The lip sticks out 1mm beyond the glass lens protector I have installed on mine. The separate camera guard also allows the case body to be printed flat, saving time and requiring no supports.

My main case body is printed in 95 A tpu, and the lens protector is petg.

If there are any changes anyone is interested to see to the case please let me know! I am happy to continue iterating.
