## Summary

Updated version of the first office business card holder

[Household](#) > [Office](#)

Tags: [business](#) [businesscardholder](#)

Updated version of the first office business card holder. Added uploaded file with Fusion360 to be able to edit the printed name and make it unique.

To make the change:

open the file with Fusion360;

select the sketch view,

EDIT the sketch "Mod for Your Name",

double-click on the text and edit to your liking.

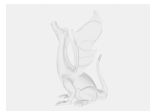

Once finished, press END SKETCH, select BODY, and export as MASH by selecting the STL file name and destination.

Open the slicer you are using and send it to print. PLA board, 0.20mm and 10% filling

It does not require any support (45 degree angles are manageable without any problem) only note if you want an even cleaner yield use low speed and to maximize the yield 0.16mm

**Share or edit the file to your liking, please just link to the original project. Thank you all for your support**
