### Summary

If you want to use your Bosch 12V jigsaw GST12 with the guide rail FSN, this is what you need.

Some time ago I bought a FSN guide rail but did not realized that there is no adapter to use my GST12... so I made one.

I had problems printing this thing in a horizontal position (I think Prusa slicer had problems creating correct supports), so this worked very well. I used a steel bed to prevent warping.

Printed on an MK4, it fits really well.

Have fun sawing :-)
