### Summary

A frame for SJCAM SJ5000x elite for GoPro-type mount, it should work also with sj5000 and sj4000

[accessorymount](#)

I designed this frame for necessity. Maybe I'm going to improve it, for example with a camera block system. If you have some ideas let me know that.

There is also the Autodesk Fusion 360 file if you want to do some adjustment. Let me know if you do an adjustment that improve the functionality of the thing!
