This is a digital **3D printable kit card** of **Dragonfly!**

Kit cards are fun, all-inclusive 3D prints that are printed flat and then assembled. This compact, 3D printable design combines the concept of a postcard with the joy of 3D printing.

The download contains a model ready to be 3D printed **flat** on a 200 mm print bed (STL).

You can **scale** the model as you wish but we can't guarantee that at a much smaller size, the model will print well.

### 3D PRINTING SETTINGS

We use these settings for most of our prints:

Layer height 0.2 mm

Infill 15 %

No supports

### ASSEMBLY:

- Use small cutting pliers to free the pieces from the kit card. Then assemble!

Do you like the model and don't have a 3D printer? There are lots of people who offer 3D printing services these days. Try searching for someone who offers them in your area.

This model was brought to life by 3Demon. We are a group of modeling and 3d printing enthusiasts based in Prague, Czech Republic. We've been making 3D printable models for more than a decade. We make a lot of cosplay accessories but we also make all sorts of interesting 3D models. You can join our community or just look at more of our creations [here](#).
