Andy's model modified to fit the Mini+ printer specifically:

- 1) increased the height to 25mm
- 2) widened the base to 23mm

In this way the two risers fit perfectly into the slot left by the hinge of the display and even if you move the Mac back and forth, the elevator always remains in place, sliding on the table: just what I wanted!

A big thank you to Andy for sharing

Good day everyone

Mario
