**I normally publish and update all my models at MakerWorld. They are only here on Printables to keep the accounts consistent.**

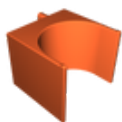

**Please [download the newest version here](#) at MakerWorld.**

A Skadis holder for a those big jetflame blow torch lighters with a diameter of about 38mm (foot ~ 60mm). I wasn't very happy with my [first version](#), so I made a new one.

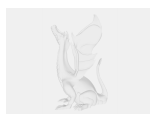

A bit of support is needed for the upper peg. Take care that the pegs are massive. In the 3mf file I used a modifier to increase to infill to 100% concentric.

I recommend using the [Skadis Lock Plug](#) (7mm) to prevent the holder from sliding out of the pegboard holes.
