Summary

A compact, quick-printing paint stand for hanging small objects along an edge or corner

[Hobby & Makers](#) > [Tools](#)

Tags: [stand](#) [art](#) [paint](#) [modelpainting](#) [spraypaint](#)

Features

- Hang objects along an internal edge or a corner in order to keep them still for painting with this 'washing line' style painting stand
- Modular, disassembles to be stored flat, and low cost - the setup shown in the photos takes less than 20g of filament to produce. Also contains hexagons. Because hexagons
- "Flat" insert allows you to stick the inside edge of an object to the stand, while the "Spikes" insert is useful for corner pieces, or curved domes

Printing Guidelines

- **Layer height:** 0.2mm
- **Supports:** No
- **Infill:** Any
