Summary

Easy to Print Heart Ring Box

Tags: [box](#) [ring](#)

Simple to print box.. with inset available to remix and put anything you'd like in it. :)

You can easily make the heart a different color by switching filaments too.

The hinge is an easy snap-fit design which should work with PLA and easy to put together.

Note: This is the first time I've designed this type of hinge.. so feedback is welcome! :)
