Summary

Hate holding your tees in your pockets or the abyss that is your bag? Me too. Try this.

Got sick of digging in the black hole that is my golf bag for tees. Print this in TPU for better fit. You can also scale the print up a percent or 2 depending on your printer or drill out the holes. I drilled mine out a bit and they fit snug.

The standard caddy has no chamfers. If your printer can handle it I included a chamfer version too.

UPDATE: Print version 2 if you want to use a little less material and make it easier to attach key rings or a carabiner.

UPDATE 2: Added a manufactured support version. This one allows your design to have uniform pattern on the whole part. It should also make it stronger over all. Print as shown in my picture. Add a brim for this method. The "fin" support will snap right off, with minimal clean up.

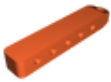

UPDATE 3: cleaned up the model a bit and added slots and fillets to all the holes. The tees should be easier to fit and remove now.

UPDATE 4: Bigger holes.

UPDATE 5 (I have gotten nothing done today): Made alternate version for a clip that is oriented from the same side the tees enter the caddy.
