## Summary

Lots of design features to make these snack grippers the ultimate!

[Household](#) > [Kitchen](#)

Tags: [gaming](#) [printinplace](#) [food](#) [chopsticks](#)

### Features...

- Aerated handle with grip bumps for comfort, lightness, ease of handling and no-slip.
- Subtle, yet effective 3° bend at end of sticks for a solid grip on those snacks.
- Teeth at the very tip perfectly come together for picking up the smallest of pieces.
- Pleasing squeeze strength. Not too firm, not too soft (also depends on filament used).
- Very fast to pick up and toss down.
- Keeps table top / desk clean with raised tips.
- Easily prints in place.
- No supports required (print upside down)

I print these with PLA.
