Summary

Suitable for AA; AAA; 9 volts and CR2032

[Gadgets](#) > [Other Gadgets](#)

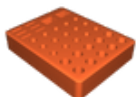

I designed this very simple model to store the batteries that I commonly use.

It can hold up to 33 batteries:

- 10 AA
- 15 AAA
- 2 cubic 9 volts
- 6 CR2032

If your printer is not correctly calibrated, you might need to upscale the model a bit for the batteries to fit. Please do a test before full print.
