Summary

This is a cartoon glove with four fingers. It looks like the kind of glove you may see on a mouse or a hedgehog.

I made this model to be used as a cake decoration. I plan to paint it. One example was printed in Prusament galaxy black petg on my mk4 with a 0.6mm Input shaper nozzle using organic supports. I scaled it to print 4" wide. I printed another version in white with a hollow middle that I used to insert black plastic stripes for the holes in the glove. I tried using UV-curing nail polish but ran into problems with it peeling off. In the end, I made a version that I covered with UV-curing clear resin and one that I left with a matte finish. I figure the cake decorator can simply choose one that looks best.

For the rings, I bought some cheap aluminum ring decorations on Amazon and I made some notches in the rings with a Swiss file and used a drop or two of clear UV resin on the underside to hold them together and onto the glove.

three-stripes-inserts.3mf

☐ I tried both arrangements but like the vertical one better due to the smooth corners
