Holders to mount to your TS1C Base

You will need m4x4 or m4x5 screws or use the original.

For the solder spool holder there a 2 “holders”.

One is for using a voron style heatset insert and one is to just screw into plastic.

I made both, but directly screwing into plastic is fine and what I am using.

Both are made to fit the same side, mirror in your slicer to fit your needs.
