### Summary

The perfect tool for anyone who does frequent soldering. It helps keep the work station nice, organized, and useful.

### Parametric Solder Station

The basic files I have included are for a 28mm wide soldering spool, and a 55mm diameter flux bottle. These dimensions are all parametric inside of Fusio360. Feel free to adjust any of the parameters and change it to your needs. I have used this for 2 years now and it has been extremely useful and very handy.

**No supports are need**

**Print with any nozzle size that you desire**
