Summary

A simple chimney cap for the MK3S/+ & MK3.5 with MMU2S or MMU3 chimney that better aligns the extruder tubing.

Prevent filament feed failures due to extruder PTFE tube misalignment when using the MMU2s or MMU3 with the MK3s/+ & MK3.5. This is a simple replacement chimney cover maintaining the stock geometry from Prusa while adding a filament guide and anti-rotation clip. This has completely eliminated my filament feed errors on both the MMU2s and MMU3 with the MK3s, MK3s+, and MK3.5 printers. I now run 70 hour + multi material prints with zero interventions.
