Summary

simple phone stand

[Household](#) > [Living Room](#)

Tags: [holder](#) [stand](#) [phone](#)

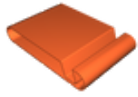

A very simple phone stand, inspired by IKEA wooden one.

The shell thickness is 1.5mm, the phone slot is 11.9mm, this should fit most phones with a silicone case, but please check yours before printing. Width is 80mm.

It's a quite simple print, the only challenge is a good bed adhesion if printed in material with high warping. I used Sunlu PETG, as I thought the glossy finish will look nice here, and it does. Print on a side.

Enjoy!
