Tags: [hexagon](#) [positron](#) [kralyn](#) [kralyn3d](#)

Stylish Hexagon Top covers for the Positron V3 Printer (<https://positron3d.com/>). Use Filament swapping to get a different color for the hex pattern on top.

Use M3 Countersunk screws for a flat surface. They're a tight fit, but hold on very well.

The covers have a different height than the originals because for some reason the originals didn't fit at all. Should be half-height compared to the originals.
