Summary

Use this For your own personal use :D

3D Printers > Accessories

You can get a wire to attach the tail to the waist and might need a little drill to make a hole as the same size as the wire you use. You can do the same for the wire that is attached to the spike (I don't know the name of the thing) to the main acid container

Made the figure with the easy 13 body and head with glow in the dark paint :)
