We have created a Chess Set that is great for travel and families. All the colours are 3D printed separately, so you do not need an AMS type system. (This also cuts down on printing time) First print the boards and then a set each of the inserts and chess pieces. Insert the little squares into the holes in the chess board. It's recommended that you slip these in on an angle (they should lock in). If they are too loose, you may glue them in, but if your printer is pretty well tuned this won't be an issue. Have fun!
