Who wouldn't want to own a car as legendary as the Škoda Octavia? Its appeal is reflected in the more than 7 million units it has sold, and the fourth generation is no exception. Its success is built on a clean, timeless design, cutting-edge technology and ample space. Arouse your inner curiosity and get your own miniature Octavia.

Competition. See the finalist and vote for winner at <https://www.instagram.com/skodagram>. Don't keep your 3D-printed Octavia model all to yourself on a shelf. Snap an original and creative photo of it, upload it to the "make section" of Škoda Octavia's 3D model at printables.com, and win one of our great prizes. The prize for the lucky winner is an exclusive Škoda Octavia experience in Mikulov, Czech

Republic, a 3D printer, and a gift basket brimming with products from the Škoda e-shop and Prusaments. Second and third place also have fantastic prizes, so be sure to submit your entry today. **The deadline for your submissions is 28 February 2024.** The full competition rules can be found [here](#).

The sleek lines and modern design really stand out in darker shades, but you can be as original as you like. Whatever colour you choose for your Octavia, it will always look great.

Impressed by the Octavia and want to find out more about it? Visit our official website <https://www.skoda-auto.com/models/range/octavia>

If you want to expand your horizons even more, take a look here too <https://www.skoda-storyboard.com/en/models/octavia/first-sketches-of-the-innovated-octavia-take-a-look/>

The digital files for models of Škoda vehicles and the 3D-printed versions of Škoda models (“products”) presented here and at printables.com are intended for the personal use of Škoda fans and for general educational purposes only. Under no circumstances may the products be commercially exploited, modified, shared, sold, rented, hosted, transferred or otherwise distributed.

Print instructions

The model is pre-oriented to be printed on organic supports, to minimize layer visibility. See the included 3MF file if you want to slice the model yourself, instead of using the uploaded G-code files.
