This easy-to-print model is for a silhouette of a Peering Cat with 3 different models for various display techniques that requires no print supports. The Silhouette can be placed on a shelf, placed in a window, screwed to the top of a fence, or where ever your creative mind desires. The models print at 8.75 inches / 222 mm wide. It can be scaled smaller or larger in your Slicer. If larger you may need to rotate in order to fit on your print plate. I recommend a 0.2mm layer height, 15% infill, low top and bottom surface count, and top surface ironing however none of these parameters are critical. Some like it thinner (z-axis scale at 60%) as it

allows more light through the eyes. This can be easily done in your Slicer as well.

There are multiple versions of this silhouette out there available to purchase on Etsy and Amazon as well as similar stl models on the internet I designed this using Fusion360 based on a photo I found online.
