**Welcome to GlennovitS3D.** Join the Club on Printables.com to **support creation of new models**, get access to **exclusive models**, and get **commercial rights**, to sell your prints. **Join today - GlennovitS3D** - or check out my **model collection** or my **popular models**

**Treasures** come in many sizes and variations - and this one is **flat-packed**! Enjoy the assembly of a small treasure chest - or give it as a **gift** for pirate-movie-fans.

It is all printed - nothing else is needed - just **print 1 card and go!**

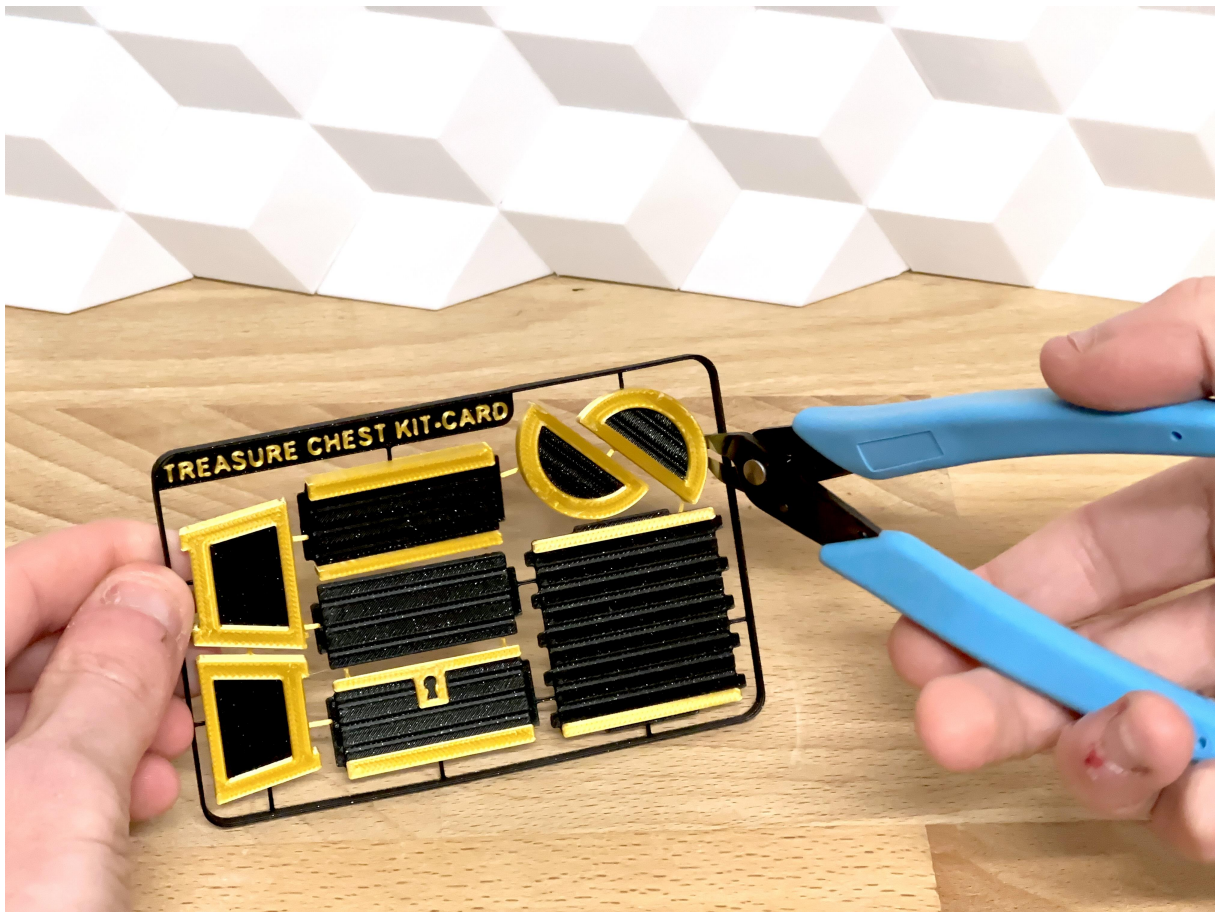

## Overview

It comes in different versions for you to print:

- **1 color** (the fastest to print!)
- **2 colors** (for details to show more clearly - my favorite)

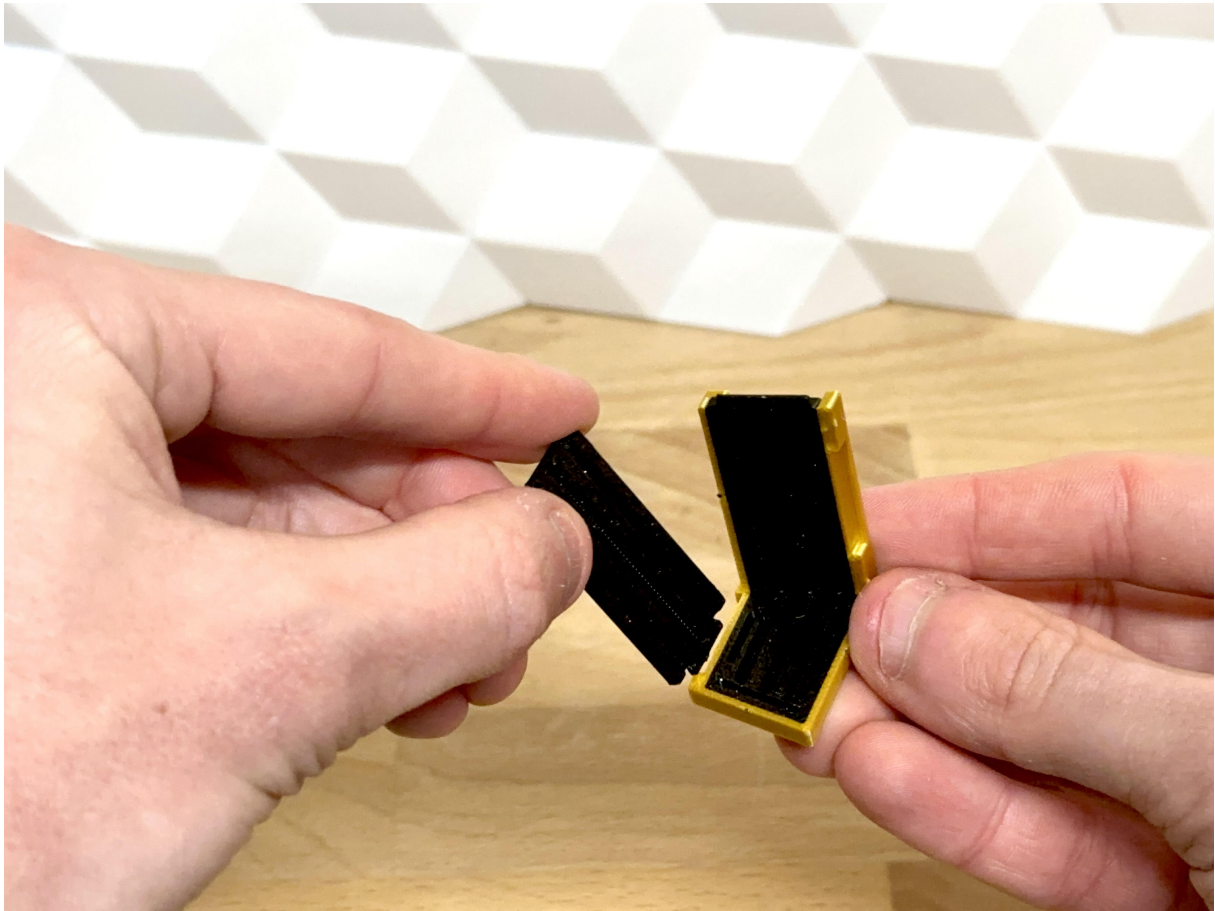

## Assembly

Assembly requires multiple steps. Here is my preferred order:

**Cut out all elements** from the card

Press a **box back** into one of the **box ends**

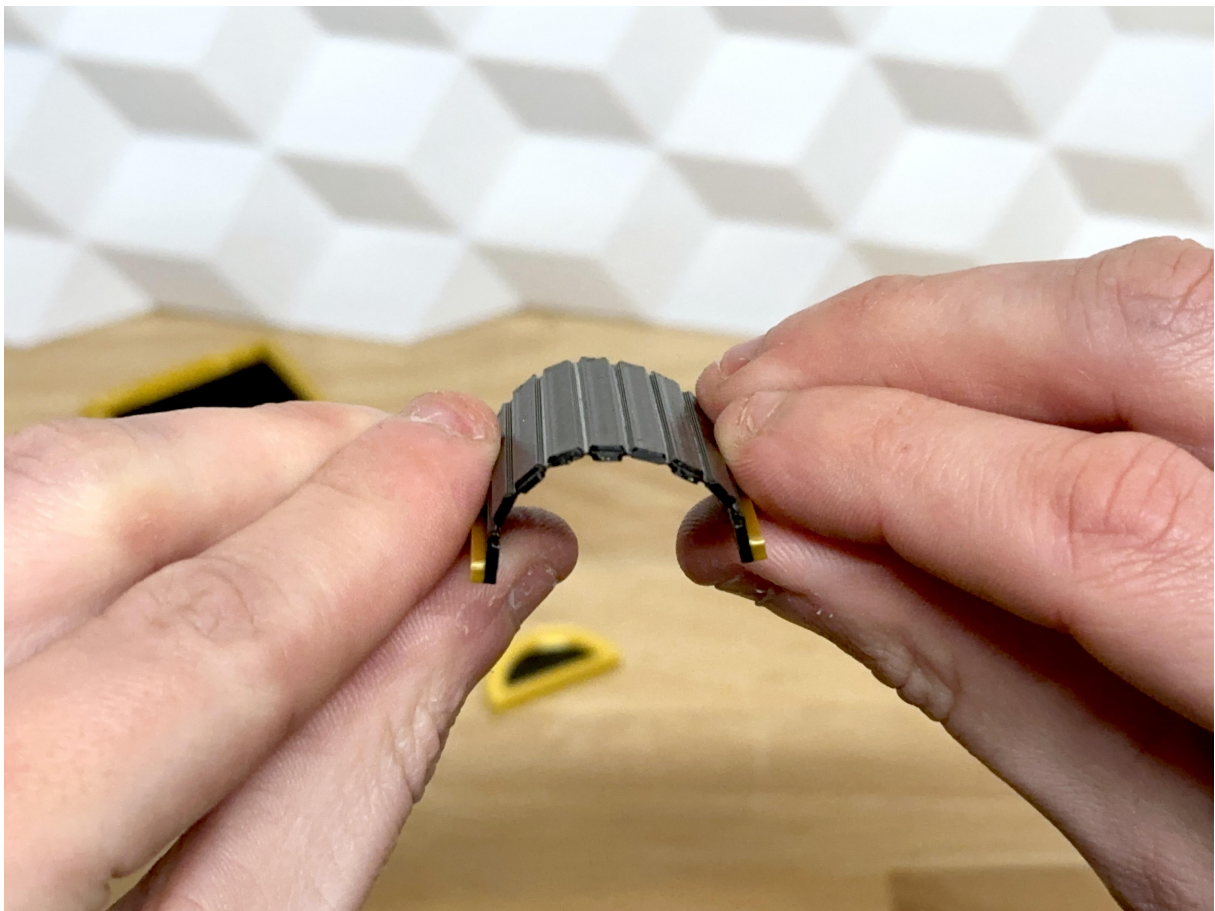

Press the **bottom** into the box end

Press the **box front** into the box end

Press the other **box end** onto the 3 pieces

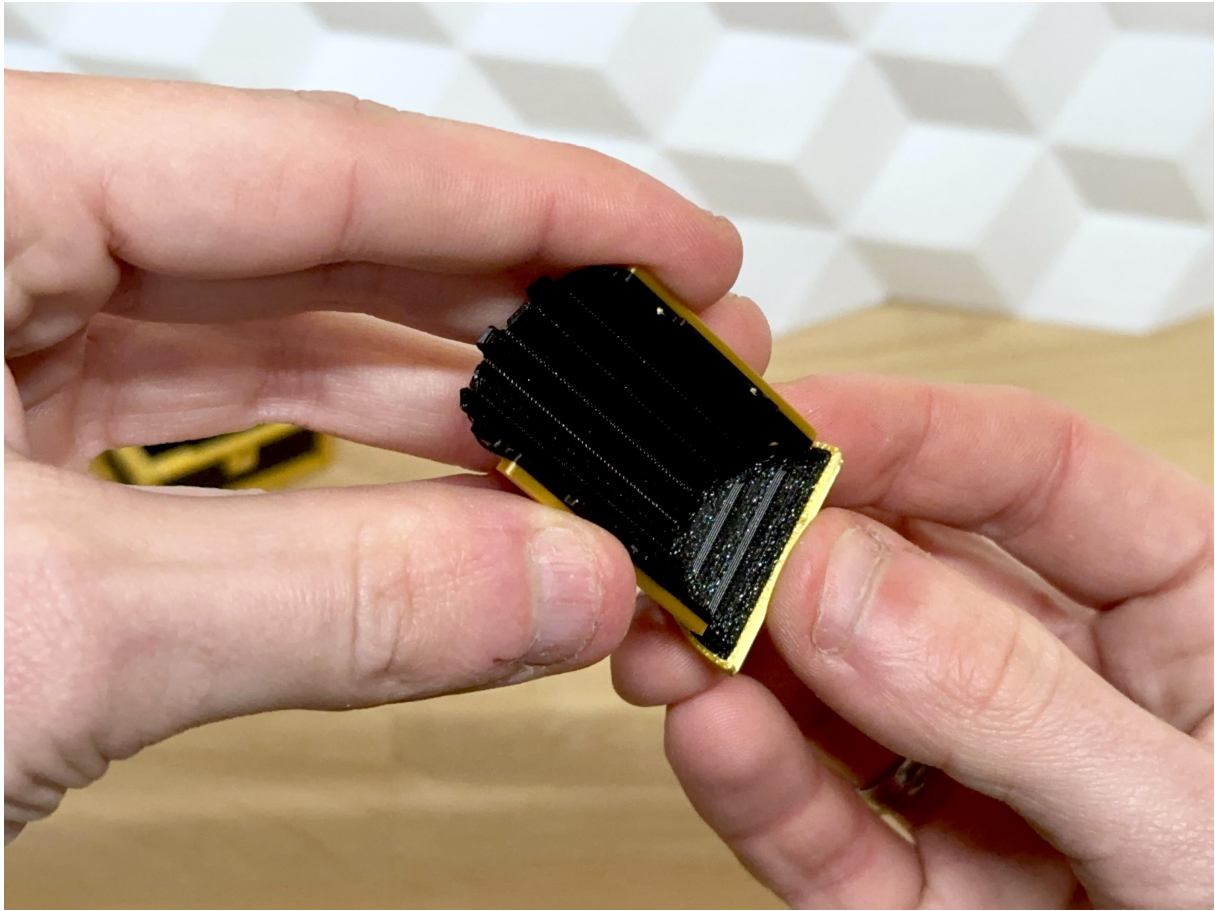

Celebrate that the bottom part is done

**Bend the lid top** to a curve that matches the lid ends

- **Tip:** Be sure to **bend all sections** to get as smooth a lid as possible - take one small section at a time.

Press the lid top into a **lid end**

- **Tip:** There are 5 small tabs to insert - **be careful** not to break them. Insert the top tab first, and then continue with the lower tabs until everything is fitted - before pressing into hard!

Press the other **lid end** on the lid top as above

Celebrate that you completed the treasure chest by putting the lid on the chest!

If any of the items is a little too loose, maybe some glue could help.

If anything is too tight, maybe sand/scrape the edges instead of pressing too hard at first.

**More games and puzzles?** Then this might be for you.. Check out this [collection of games and puzzles](#) - everything from 1-part prints to more complex models - have

## Print instructions

Here is a few suggestions:

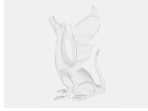

- **Speed:** Low 1. layer speed (maybe below 50% of normal - just the first layer to ensure bed adhesion with all the small lines)
- **Orientation:** The cards should be oriented correctly
- **Brim:** No. Would take a long time to clean the model..

Happy printing!
