Summary

Well... a sea horse with a horse head. Floating upright!

Tags: [mashup](#) [horse](#) [seahorse](#) [why](#)

An upright swimming sea **horse** to play around in the bathtub. As I'm no 3D modeller it's a bit of a bodge job, but at that size the transition between the head and the body looks good enough.

Print it upright with the modifiers according to the provided 3mf (0,4mm nozzle, layer height of 0,2mm, solid infill and organic supports).

Requires a single M6x20mm ISO4762 screw, that gets inserted into the print at a height of 70mm where a pause/colour change is specified. This lowers the center of gravity so it can swim upright.
