I did not like all the models that are here, so I created one for myself.

Compatible with the original Nintendo Switch, not OLED model.

It comes with 2 slot for a spare pair of joy cons and 3 slots for cartridges.

Slit for a dock power LED, and a bit misaligned one for a USB port.

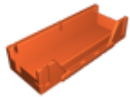

Mount it with Skadis_Universal_Hook <https://www.thingiverse.com/thing:2853257/files> or similar variation of this hook you prefer.

Printed with 20% infill density, adaptive cubic pattern.

Hooks I prefer to print > 50% density.
