image clips

For hanging pictures, poleroids, greeting cards and the like.

The clips are strung on a suitable cord or rod (max. 6mm).

Due to the 'pre-tensioned' creation of the clips, they have a high holding force.

The 'Photo' clips are a remix of my own [Spring clips](#). The spring clips are also available in two other sizes and designs.

To ensure functionality even with thin photos, I adjusted the length and angle of the gripping plates accordingly.

Print settings

Material: PETG (ideally), PLA

Line width: 0.4

Wall lines: 3

Filling: none
Printing plate adhesion: Brim (if necessary)
Support structure: none
easy to print
Material requirement: only approx. 2.4g

This remix is based on

Spring clip
