Summary

Multicolor Idefix for Prusa XL 5T

[Toys & Games](#) > [Action Figures & Statues](#)

multicolor print of the Idefix modell from NachoRoPe for the Prusa XL. The base of the model has been flattened somewhat.

I used Prusaslicer Version 2.7.2 for coloring and printing, as the time of upload it was the RC1. It works nearly flawless.

Filamanet is eSun PLA+ in white and black for Idefix and skin for the bone. Printed with 205°C and 0.15 layer hight. The modell is now at 50%, which gives a hight of 46mm. Great addition to Reddadsteve's models of Asterix & Obelix.
