Summary

Multicolor Idefix for Prusa XL 5T

[Toys & Games](#) > [Action Figures & Statues](#)

multicolor print of the Woodstock modell from Misterdid for the Prusa XL. I strengthened the legs a bit.

I used Prusaslicer Version 2.7.2 for coloring and printing, as the time of upload it was the RC1. It works nearly flawless. Before 2.7.2 I always had problems with the two colors, it looked very smeared in some places. Filamanet is eSun PLA+ in yellow and black, 0.15 layer hight. The modell hight is 46mm. Great addition to Reddadsteve's models of the peanuts, espacially for Snoopy and his house.
